

SCIT ORIENTATION 2026 : Speaker-wise Anchoring & Presentation Script

1. Welcome Address : Siddhi Tyagi - President

Good morning everyone!

Respected Head of the Information Technology Department, our respected Faculty Coordinator, esteemed faculty members, seniors, and most importantly, all our first-year students — a very warm welcome to **SCIT Orientation 2026**.

Starting college can be exciting, but at the same time, there can be a lot of questions.

What should I learn beyond my academics?

How do I explore technology?

How do I meet new people and build my skills?

And how do I make the most out of these college years?

And that's exactly where a community like **SCIT** comes in.

So, let's begin by understanding what SCIT is all about.

2. About SCIT

SCIT — the Student Council of Information Technology at MIET — is a vibrant community of tech enthusiasts and leaders.

You don't need to already know how to code or have experience with different technical domains.

In fact, you can discover whether you're interested in **Web Development, Artificial Intelligence and Machine Learning, Cloud Computing** or even areas like content, design, social media, public relations, cultural events and event management.

Now, as first-year students, you may not be joining the SCIT teams or committees just yet.

But this orientation is to **get an idea of what you can look forward to from your second year onwards.**

So, use this year to explore your interests, build your foundation, and understand where you see yourself contributing in the future.

3. Vision & Mission

The **vision of the Student Council of Information Technology** is to foster **innovation, collaboration, and leadership** among students.

We aim to support students' **academic and professional growth** through **networking opportunities, skill development workshops, and industry engagement**.

4. Introduction of HOD & Faculty Coordinator

Behind every successful student organization is the guidance and support of inspiring mentors.

It is now my privilege to acknowledge the mentors who continuously support and guide SCIT.

We would like to express our sincere gratitude to our respected **Head of the IT Department, Prof. Dr. Swati Sharma Ma'am**, whose leadership and guidance motivate us to strive for excellence.

We would also like to extend our heartfelt thanks to our **SCIT Faculty Coordinator, Ms. Preksha Pratap Ma'am**, whose constant encouragement and valuable guidance play an essential role in every SCIT initiative.

Let's give them a **huge round of applause**.

5. I would now like to invite our **Co-President, Umang Chaudhary**, to take us through the **SCIT Core Team**.

Umang, over to you.

5. MEET THE SCIT CORE TEAM : Umang Chaudhary - Co-President

Thank you for the opportunity.

It's time to introduce the people who work behind the scenes to turn these ideas into reality.

Our **Core Team** works throughout the year to plan, organize, coordinate, and execute various SCIT activities and initiatives.

6. Let's begin with the **President**.

On the left is **Rasheswar Sharma**, our former President from the 4th year, who led SCIT with dedication and commitment.

He is here with us today, seated among us. **Everyone, let's give him a huge round of applause!**

Taking forward the position of President is **Siddhi Tyagi**, from 3rd year, as the newly appointed President of SCIT. Let's give her a warm round of applause as well.

7. Next, we have the position of **Co-President**.

Our former Co-President, **Manu Chauhan**, from 4th year, has completed his tenure. He is also here with us today. **Please give him a huge round of applause!**

He will be interacting with all of you shortly during our Tech Talk on Web Development, so make sure you stay tuned for that.

The responsibility is now being carried forward by **Umang Chaudhary**, who is me, from 2nd year, as the newly appointed Co-President.

8. Our former Vice-President, **Mayank Chaudhary**, from 4th year, has completed his tenure.

And taking forward this responsibility is **Drashti Thakur**, from 3rd year, as the newly appointed Vice-President.

9. We also have our **Secretary, Prabhneet Kaur**, and **Vice-Secretary, Priyanshu Sagar**, both from 3rd year.

10. For the position of **Treasurer**, our former Treasurer was **Abhishek**, from 4th year, and the responsibility is now being taken forward by **Palak Panwar**, from CSE 3rd year, as the newly appointed Treasurer.

11. Our **Management Head is Kirti Sharma**, from 3rd year.

12. Our **Designing & Technical Head is Mansi Vashisht**, from 3rd year.

13. Our **Decoration Head is Divyanshi Rani**, from 3rd year.

14. Our **Discipline Head is Madhur Vaibhav**, from 3rd year.

15. And our **Public Relations Head is Ansh Siwach**, from 3rd year.

Let's give a **huge round of applause to our former core team members** and to our **newly appointed team for taking up these responsibilities and carrying the legacy forward.**

16. I would now like to invite our **Decoration Head, Divyanshi Rani**, to take us through the different teams you can join.

Over to you!

16. TEAMS YOU CAN JOIN : Divyanshi Rani - Decoration Head

Hello everyone! 🖐️

If you're interested in being a part of our society, we have several exciting positions open, and each one plays an important role in making our events successful.

17. First, we have the Management Team. This team is the backbone of every event. They organize and coordinate events, manage logistics, registrations, and ensure that everything runs smoothly on the event day.

18. Next is the Content Team. If you enjoy writing, brainstorming ideas, or creating engaging content, this role is for you. You'll help prepare event scripts, captions, announcements, and creative content for different activities.

19. Moving on to the Public Relations (PR) Team. This team builds collaborations with other societies and organizations while handling external communication and representing our society professionally.

Next, we have the Social Media Team. If you're passionate about social media, you'll create posts, reels, stories, and event updates while helping us engage with our audience and maintain an active online presence.

We also have the General Member role. As a general member, you'll actively participate in society activities, assist different teams whenever required, and gain experience by contributing to various events.

20. For all the creative minds, we have the Design & Decoration Team. You'll design posters, banners, certificates, and also plan and execute stage and venue decorations to

bring every event theme to life.

Next is the Technical Team. This team provides technical support during events, manages digital platforms, and ensures all technical aspects run without any issues.

21. Lastly, we have the Discipline Team. Their responsibility is to maintain discipline during meetings and events, manage the crowd, and ensure everything runs in an organized and smooth manner.

No matter your skills or interests, there's a place for everyone in our society. So choose the role that matches your passion, step out of your comfort zone, and become a part of our team.

Thank you, and we look forward to welcoming you!

After Divyanshi — Umang

Thank you, for taking us through the different teams and opportunities at SCIT.

22. To begin our Tech Talk, I would like to invite our former Co-President and 4th-year senior, **Mr. Manu Chauhan**, to share his insights on Web Development.

Give him a warm round of applause!

23. TECH TALK - WEB DEVELOPMENT : Manu Chauhan

Let's give him a big round of applause! Thank you for that insightful session on Web Development.

To take us through another super fascinating domain, I invite **Palak Panwar, the treasurer**, to the stage.

Give her a warm round of applause!

24. TECH TALK - ARTIFICIAL INTELLIGENCE & MACHINE LEARNING : Palak

Good morning everyone!

Now let's talk about AI and ML.

AI has evolved a lot over the years. Pehle AI sirf simple rule-based systems tak limited thi, but today it can understand language, recognize images, generate content, and even solve complex problems. That's why AI is becoming a part of almost every industry.

Many people think that AI and Machine Learning are the same, but actually they're not. AI is the bigger concept, while Machine Learning is a subset of AI. In simple words, AI is the goal to make machines intelligent, and ML is one of the ways to achieve that goal."

Nowadays, Artificial Intelligence is everywhere. ChatGPT, Google Maps, YouTube recommendations, Instagram Reels, Face Unlock—all these are powered by AI.

Machine Learning (ML) is a part of AI. It helps machines learn from data, just like we learn from our teachers, books, and practice.

As shown in this slide, AI follows a simple process. First, it collects data, then cleans and organizes it, after that it learns from the data, its performance is evaluated, and finally it is deployed in real-world applications.

Just like us, AI also doesn't become smart in one day. It learns step by step, makes mistakes, improves, and becomes better with practice.

And that's exactly what we should do as students. Don't think AI is only for experts. Every expert was once a beginner. If you start learning from your first year, you'll already be ahead of many others by the time you graduate.

And that's where SCIT Society comes in. Through guest lectures, workshops, technical events, hackathons, and hands-on activities, you'll get opportunities to explore AI and other emerging technologies beyond the classroom.

So don't just study for marks—study for your future. Join SCIT Society, learn new skills, build your confidence, and grow with us.

Thank You!

After Palak - Umang

A huge round of applause for her, everyone!

Thank you, for taking us through the world of AI and Machine Learning.

And now, let's explore another technology shaping the digital world - **Cloud Computing**.

I invite **Priyanshu Sagar, the Vice-Secretary of SCIT** to the stage to take us through this exciting domain.

Give him a warm round of applause!

25. TECH TALK - CLOUD COMPUTING : Priyanshu Sagar

Good morning everyone!

Respected teachers and my dear friends, a warm welcome to all of you.

My name is Priyanshu Sagar, and I am the Vice Secretary of SCIT. It is my pleasure to be here today to share some knowledge about Cloud Computing with all of you.

Before I begin, let me ask you a simple question.

How many of you use Gmail, Google Drive, YouTube, or Netflix?

I'm sure most of us do. These applications work because of cloud computing.

Now, let's understand what cloud computing actually means.

Cloud computing means using computer services like storage, servers, software, and databases over the internet instead of storing everything on your own computer.

In simple words, cloud computing allows us to store data and use applications through the internet.

Now let's see how it works.

When you upload a photo to Google Drive, it is stored in a data center instead of your phone. Whenever you open Google Drive, you can access that photo from anywhere through the internet.

Cloud computing has three main types: Public Cloud, Private Cloud, and Hybrid Cloud. Public Cloud is open to everyone, Private Cloud is used by one organization, and Hybrid Cloud is a combination of both.

Cloud computing also has three service models: IaaS, which provides virtual computers and storage; PaaS, which provides a platform to develop applications; and SaaS, which provides ready-to-use software like Gmail and Google Docs.

Now let's look at its benefits.

Cloud computing allows us to access data from anywhere, provides automatic backup, saves time and money, and makes it easy to increase storage whenever needed.

Like every technology, it also has a few disadvantages. It requires an internet connection, and sometimes there may be server or security issues.

Today, cloud computing is used in education, banking, hospitals, online shopping, social media, and many other fields. Almost every big company uses cloud computing because it makes work faster and more efficient.

To conclude, cloud computing has become an important part of our daily lives. It helps us store data, use applications, and work from anywhere. As technology continues to grow,

cloud computing will become even more important in the future.

Thank you everyone for your time and attention. I hope you learned something new about cloud computing. Have a wonderful day!

After Priyanshu -

Let's give him a well-deserved round of applause, everyone!

Thank you, for taking us through Cloud Computing.

Now, let's move on to our next segment — a little break from the technical talks and a chance to test your tech knowledge!

26. FUN ACTIVITY - TECH TRIVIA : Drishti Thakur & Mansi Vashisht

Now that we've explored different technical domains, let's take a break from all the learning and put your knowledge to the test!

It's time for a **fun and interactive Tech Trivia session.**

This is your chance to see how much you know about technology — and maybe learn something new along the way.

To guide us through this activity, we have **Drishti Thakur and Mansi Vashisht** with us.

So, everyone, get ready to participate, think fast, and most importantly — have fun!

Drishti and Mansi, over to you!

[After the Tech Trivia]

That was certainly an exciting session!

Thank you, Drishti and Mansi, for conducting the Tech Trivia, and a big round of applause for everyone who participated.

To take us through some of the memorable moments and events of SCIT, I would like to invite our **Secretary, Prabhneet Kaur**, to the stage.

27. GLIMPSE OF SCIT EVENTS : Prabhneet Kaur

Good Morning Everyone!

I'm here to give you a quick introduction to SCIT Society.

SCIT is not just a society, it's a platform where you get opportunities to learn beyond the classroom.

28. As you can see, our society has organized Guest Lectures on trending technologies like AI, Robotics, Blockchain, **29.** Web3, AR/VR, and Career Guidance, where industry experts shared their real-world experiences.

30. We also organize Industrial Visits, which give students practical exposure and help them understand how industries actually work.

31. Apart from that, SCIT conducts technical events, workshops, seminars, and fun activities throughout the year, so you can improve your technical skills, communication, teamwork, and confidence.

32. Being a part of SCIT also gives you opportunities in event management, networking, leadership, and personality development, which are really helpful for your career.

So, if you want to learn new things, build your skills, make new connections, and enjoy your college life, I would definitely encourage you to join the SCIT Society.

Thank You! Hope to see you as a part of SCIT Family.

33. CONNECT WITH SCIT & CLOSING : Umang Chaudhary — Co-President

Thank you, for taking us through those wonderful glimpses of SCIT.

If anything you've seen today interests you, we encourage you to take the next step and become a part of the SCIT community.

You can connect with us through our official **Instagram and LinkedIn handles** shown on the screen.

34. And don't forget to join our **SCIT WhatsApp community** by scanning the QR code.

This will help you stay updated with our **workshops, competitions, announcements, events, and other opportunities** throughout the year.

35. Vote of Thanks

As we come to the end of today's orientation, I would like to extend our heartfelt gratitude to our respected **Head of the Information Technology Department, our Faculty Coordinator, esteemed faculty members, our seniors, the entire SCIT Core Team, and all the students who joined us today.**

Thank you everyone, and have a wonderful day ahead!
