

Script – UiPath

Hello everyone! I'm **Punit Mittal** from the **Information Technology Department** at **Meerut Institute of Engineering & Technology, Meerut**.

At MIET, we equip students with the skills that industries are looking for today. And one such powerful skill is **Automation with UiPath**.

UiPath is all about making life easier. Why spend hours on repetitive tasks when **software robots** can do them for you?

With UiPath, you can **create bots** that click, type, move data, generate reports—just like a human.

The best part? You don't need to be a programming expert. With UiPath, you can build **automations** easily by just dragging and dropping steps.

Companies in banking, healthcare, manufacturing, and retail use UiPath to **save time** and **work smarter**.

Hospitals automate patient data, businesses handle invoices and payroll in minutes, and AI-powered bots help make smarter decisions.

Learning UiPath gives you a skill that's in **high demand worldwide**.

At MIET, we provide **hands-on training with UiPath** so you can turn knowledge into real-world solutions.

Step in today, at **MIET** to **explore the world of UiPath** and become **industry-ready**.
